

DIGITAL PRODUCT & GROWTH STUDIO

From invisible *to inevitable.*

We design and build websites, apps and 3D experiences — then run the SEO, ASO, automation and social that make them impossible to ignore.

01 — WHAT QUARKS ACTUALLY DOES

Most agencies stop at the deliverable. We ship the product and the system that grows it.

One team designs the interface, writes the code, tunes the search rankings, automates the back office and runs the channels. No handoffs between four vendors. No one to blame but us.

ONE TEAM

Strategy, design, engineering and growth sit in the same room and ship on the same board.

ONE TIMELINE

Design and marketing start together, so launch day has an audience already waiting.

ONE ACCOUNTABILITY

A founder is on every project. You talk to the people doing the work, not an account manager.

02 — SERVICES

Ten things we do. All of them properly.

Pick one or take the full stack. Every engagement has a named lead, a fixed scope and a date.

01 Build The product itself

UI/UX design

2-4 WEEKS

Research, wireframes and a design system your developers can actually build from — not a picture that falls apart in code.

AUDIT • FIGMA SYSTEM • PROTOTYPE

Web development

3-8 WEEKS

Next.js sites that load in under a second, rank out of the box, and can be edited by someone who has never seen a terminal.

NEXT.JS • CMS • CORE WEB VITALS

App development

8-16 WEEKS

Cross-platform iOS and Android apps, from the first screen to the store listing and the crash dashboard after launch.

REACT NATIVE • API • STORE RELEASE

3D & interactive

2-6 WEEKS

WebGL scenes, scroll-driven film and product configurators — the reason people stay on the page instead of bouncing.

THREE.JS • GSAP • SCROLL FILM

02 Grow Being found, and converting

SEO

90-DAY CYCLES

Technical repairs, content architecture and digital PR aimed at the top three results — reported as traffic and revenue, not vanity keywords.

TECHNICAL AUDIT • CONTENT • DIGITAL PR

ASO

MONTHLY

Store listings, creative sets and keyword coverage tuned until an install costs less than it did last month.

KEYWORDS • CREATIVE • A/B TESTS

Performance & CRO

4-WEEK SPRINT

We find the exact steps where money leaks out of your funnel, then close them one experiment at a time.

SPEED BUDGET • FUNNEL TEARDOWN • EXPERIMENTS

Business automation

2-6 WEEKS

The spreadsheet work your team repeats every week, handed to software: lead routing, CRM sync, invoicing, reporting, AI agents for the boring parts.

WORKFLOW MAP • INTEGRATIONS • AI AGENTS

03 Amplify Attention, on repeat

Social media marketing

MONTHLY RETAINER

Channel strategy plus daily execution and community management — a team that posts, replies and reads the analytics.

STRATEGY • COMMUNITY • PAID

Content production

PER PRODUCTION

Photo, video and 3D shot in one production block, cut into a quarter of feed-ready assets you own outright.

DIRECTION • EDIT • ASSET LIBRARY

03 — HOW AN ENGAGEMENT RUNS

01

Observe

Two weeks inside your market, your analytics and your customers' language.

02

Define

Scope, budget and success metric agreed in writing before anyone designs.

03

Build

Weekly demos on a live URL. You watch it come together, not a slide about it.

04

Launch

Ship, plus the campaign that makes launch day louder than a press release.

05

Compound

Monthly cycles of measurement and optimisation. Results get bigger, not staler.

04 — SELECTED WORK

Products we put into the world.

CASE 001

MOSARAM

Automobile • 2026

BRAND FILM • WEBSITE • LAUNCH
CAMPAIGN

CASE 002

KUTE

Dating app • FlaminCo • 2025

PRODUCT DESIGN • APP BUILD •
ASO

CASE 003

ATLAS

Streetwear • 2026

E-COMMERCE • DROP MECHANICS •
SOCIAL

05 — THE STUDIO

Five founders, one field. Everyone here builds.

Quarks started in Bhubaneswar in 2024 because good products kept losing to worse products with better distribution. We fixed that by refusing to separate the two: the people who design your interface also own how it gets found.

10+

PRODUCTS SHIPPED

10,000+

LIVES IMPACTED

9

COUNTRIES REACHED

**SAKSHAM**

CO-FOUNDER • CTO

Writes the code that ships. Turns a design file into a product that loads in under a second and holds up under real traffic.

**VINAYAK**

CO-FOUNDER • GROWTH

Market research and growth strategy. Decides where the budget goes and proves what it brought back.

**TRISHA**

CO-FOUNDER • CREATIVE

Creative direction and brand strategy. Finds the sentence a company can own, then makes everything look like it.

**SHUVAM**

CO-FOUNDER • PRODUCT

Product design and feature scoping. Keeps every build pointed at a user who actually exists.

**REYANSH**

CO-FOUNDER

Rounds out the founding team, working across client delivery and studio operations.

06 — START SOMETHING

Tell us what you're building.

Send a paragraph about the product, the deadline and the budget range. You'll get a reply from a founder within one working day — not a form auto-response.
